

## 7.0/3.04 mm and 3.5/1.52 mm

### Description and purpose

These coaxial adapters, operating between 0 and 18 GHz, are designed to connect microwave devices of 7.0/3.04 mm path with devices of 3.5/1.52 mm path. The adapters are designed with male-male, female-female and female-male connectors with inch or metric thread. Adapter bodies and nuts are made of stainless steel. Central conductors are made of tempered beryllium bronze and plated with wear-proof gold. Low dielectric permeability and high strength insulation is applied. Used materials and adapter design provide low loss and reflection, high stability for at least 3000 connect/disconnect cycles at operating temperatures between  $-60^{\circ}\text{C}$  and  $+85^{\circ}\text{C}$ . Minimum screen attenuation is 100 dB. Custom adapters with maximum operating temperature up to  $+110^{\circ}\text{C}$  are available for ordering. The adapters are manufactured in accordance with ZhNKU.468562.002 TU specification.
